Water Conservation Tips:

- Check household faucets for leaks. A faucet with even a slow drip takes 10- 25 gallons of water. 15 drips per minute add up to almost 3 gallons of water wasted per day.

- Keep showers to 5 minutes or less in length. A five-minute shower takes 10- 25 gallons.

- Keep a pitcher of water in the refrigerator. You won't have to run tap water to cool it.

- Use a broom to sweep your driveway, garage, or sidewalk instead of using water.

- Use a bucket of water to wash your bike or the family car and rinse quickly with a hose.

- Fertilize your lawns with a high Nitrogen fertilizer at least twice a year.

- Water your lawn in the evening or in the early morning to avoid evaporation. Be careful to water only the lawn and not the sidewalk or street.
Use water only when you need it. Don't leave water running;
be sure to turn it off when you are finished.
